PROFESSIONAL SUMMARY

Software Engineer with 5 years of professional experience and expertise in the front end and back end areas. Experienced in developing scalable and maintainable solutions across front end and back end environments, with a focus on code quality, problem solving and continuous improvement.

WORK EXPERIENCE

Software Engineer at Freelance from *Sep 2026 to Present*

Develop and maintain application platforms for *Escuela de Natha Yoga* (Natha Yoga School) using Laravel and PHP.
Utilized Opencode, Github Copilot and Claude to accelerate feature development.

Software Developer and Front end manager at LIESA from *Sep 2024 to May 2026*

Developed UI component library follows a Figma design. Used Bootstrap v5 for utility classes and LESS.
Developed and maintained applications using Angular v18 (HTML, SCSS, TypeScript), Odoo, Magento 2, PHP, JavaScript, .NET and C# for an electrical distribution products.
Participated in each step of the product development process from ideation to development improvement.
Utilized Copilot and Claude AI tools to accelerate development and refactoring process.

Software Developer at HMS from *Jan to Sep 2024*

Implemented scalable and maintainable software solutions using Angular v18 for Argentine digital company health.

Front end Developer at Freelance from *Mar 2022 to Jan 2023*

Provided support and maintenance for existing systems using Angular v15.
Developed and maintained front end web applications using Wordpress, Javascript and PHP for lawyer service application in cloud based environments like AWS.

Software Developer at EDSA from *May to Dec 2021*

Worked on support and maintenance using PL/SQL, JavaScript, and JSP and developed front end features using Angular v15 for a private health insurance in a software factory company.

Front end Developer at Pladema from *Aug 2020 to May 2021*

Developed and maintabled user interfaces using Angular v11, HTML, SCSS and TypeScript for urban video surveillance system platform in Tandil.

Intern at Pladema from *Aug 2019 to Aug 2020*

Test and analysis of AI platforms like YOLOv3 using Python.

EDUCATION

Bachelor's Degree in Software Engineering at Universidad Nacional del Centro de la prov. de Bs. As. since 2026

Bootcamp QA Automation at Solvd from Dec 2022 to Feb 2023
Developed automated API and Facebook login test suites in Java using TestNG, Carina API and Carina Core.
Designed a relational database schema for a library management system using Java and MySQL, modeling entity relationships and normalization.
Built a class hierarchy within the transport domain in Java.

PROJECTS

Dissertation: Bad Smell Detection in Microservices based Applications
Technologies: Java, Maven, Spring Boot, Docker. This work presents a process for the analysis and detection of the Shared Library smell, which occurs when multiple microservices depend on the same library, using the static analysis tool MSANose combined with AI techniques.

TECHNICAL SKILLS

Programming Languages: TypeScript, PHP, Java, JavaScript, Python, C#, HTML5, SCSS, CSS.
Frameworks & Libraries: Angular, Bootstrap, Redux, Laravel, .NET, LESS.
Databases: PostgreSQL, MariaDB, MySQL.
Platforms: WordPress, Magento, Odoo.
AI tools: Claude, Github Copilot, Opencode.

LANGUAGES

Spanish: Native.
English: B2.

CERTIFICATIONS & ACHIEVEMENTS

1st Prize at JAIIO 49 EST Contest, 2021. "Analysis and Design of Algorithms for Video Synopsis". Presented an application to do a security video synopsis from 60 to 8 minutes.
OWL Ontologies Course at CACIC, 2018.
Object Oriented Modeling with Rational at IBM Program, 2017.
